

Self-leveling pedestal 115/175 mm

The self-levelling pedestal for wooden decks is composed of a disc-shaped base that allows to create or compensate up to 5% of slope on 1 meter. It is ideal for laying on sloping or uneven terrain.

Application & Use

Creation of natural wood or composite wood terraces for pedestrian use.

The installation is done only on stabilized ground. Only use wooden joists for wooden decks and composite joists for composite blades.

Technical Characteristics

Composition : polypropylene (recycled and recyclable)

Color : black and red

Origine : France

Garantee : 10 years

Conformity : norm DTU 43.1

Use : pedestrian only

Base diameter : 200 mm

Head diameter : 120 mm

Lug height : 29 mm

Resistance to temperatures : from -40°C to +60°C

Resistances to atmospheric agents : UV and freeze

Load resistance : up to 1 ton

Product Advantage

- + Simplified ground preparation
- + Base designed to ensure proper drainage of stormwater
- + Adjustment to the millimeter thanks to the nut without additional tools
- + Compatible with natural and composite blades
- + Aesthetically pleasing thanks to invisible fasteners and regular blade spacing
- + **Compatible accessories :** blade spacers, bituminous strip for wooden blades, self leveling disc.
