### Why YEED ?

YEED is a **French brand**, specialized in the production of adjustable pedestals and accessories dedicated to the **layout and optimization of outdoor spaces**.

We offer a wide range of quality products, **certified and guaranteed**, designed to be adapted to any type of application, in a sustainable way.

All the materials we use are recycled and recyclable, and they are part of a **responsible and environmentally friendly approach**.

Our added value also comes from our network of partners, involved and dedicated to their respective markets, in order to ensure a fast distribution and a premium quality service to our customers.

All over Europe and the rest of the world, YEED is committed to providing you with high quality products and the best service.

## OUR PRODUCTS

A complete range of **pedestals and accessories** for outdoor structures dedicated to **wood, composite and slab flooring**.

---

## ADAPTABILITY

### Laying on all supports

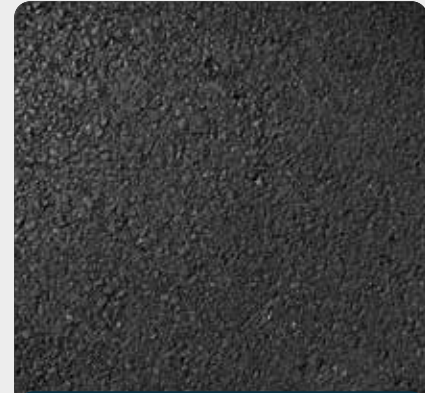

---

**Stabilized Gravel**

**Concrete slab**

**Bitumen**

**Waterproofing** ( Laying on EPDM ), **Rooftop**

**Old terrace**  
( All type )

## Types of applications

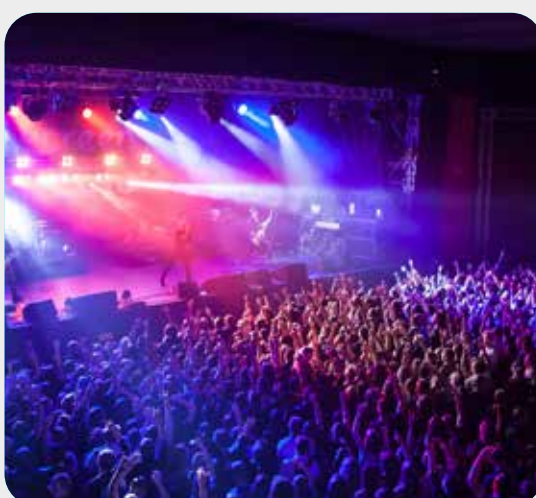

The adaptability of YEED products allows the realization **of various projects** while meeting the specific expectations of our different customers, whether they are **architects, private builders, public markets or individuals.**

- ☒ Industrial sites
- ☒ Shopping centers
- ☒ Private homes
- ☒ Work offices
- ☒ Hotels, restaurants, rooftops
- ☒ Pool beaches, spas, swimming-pools
- ☒ City pedestrian zones (station square, student zone...)

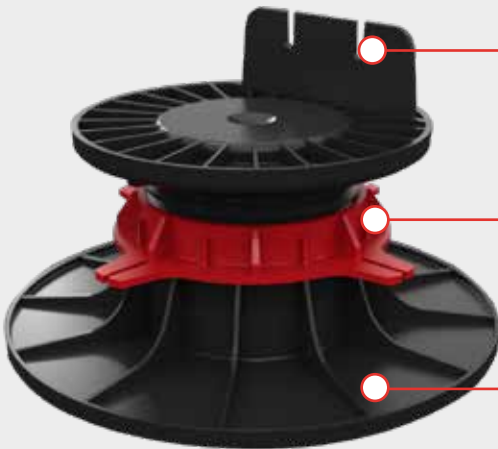

## Types of applications

The YEED pedestals and accessories are also a **suitable solution** dedicated to «niche» applications. Our devoted teams accompany you from A to Z, to set up your **specific projects**.

- ☒ Trade shows, specific events
- ☒ Festivals, concerts
- ☒ Holidays club, campings
- ☒ Wooden structure on stilts
- ☒ Solar panels

## Pedestals for wood and composite flooring

**Lug** designed to wedge and screw the joist onto the pedestal head

**Adjustable clamping screw** for a height adjustment to the millimeter without additional tools

**Base plate** designed to ensure proper water drainage and optimal stability thanks to its 20cm diameter

☒ Pedestal heights : from 8 to 700 mm

☒ Compatible with wood, aluminum or composite joists

## Technical characteristics

Resistance to heavy charges	Bear more that 1T weight load
Resistance to temperature variations	-40°C to +60°C -104°F to + 140°F
Resistance to atmospheric agents	Frost, UV
Resistance to solutions	Acidic and chemicals

# PEDESTALS CHARACTERISTICS

## Pedestals adaptable to different types of pavement (concrete slabs, gratings, porcelain stoneware, rectified natural stones..)

**4 lugs** designed to accommodate a square or rectangular tile and achieve a 3mm rectified spacing

**Adjustable clamping screw** for a height adjustment to the millimeter without additional tools

**Base plate** designed to ensure proper water drainage and optimal stability thanks to its 20cm diameter

☒ Pedestal heights : from 8 to 700 mm

☒ Compatible with slabs from 2cm thickness

Use	Pedestal areas only
Coating for wooden pedestals	wooden, composite and aluminum joists
Coating for paving pedestals	Square and rectangular slabs (from 2cm thick)
Pedestals types	Fixed, adjustable, self-leveling, post pedestal, special EPDM

# DECKING PEDESTALS RANGE

## Adjustable pedestals for wood and composite decks

8/20 mm

25/40 mm

90/150 mm

150/260 mm

60/90 mm  
post pedestal

Adjustable pedestals for paving

8 mm (fixed)

8/20 mm

25/40 mm

40/60 mm

60/90 mm

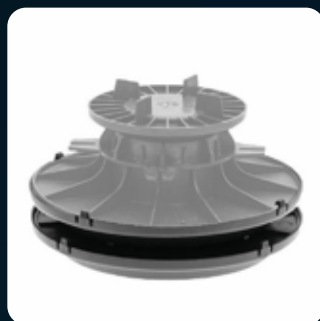

90/150 mm

150/260 mm

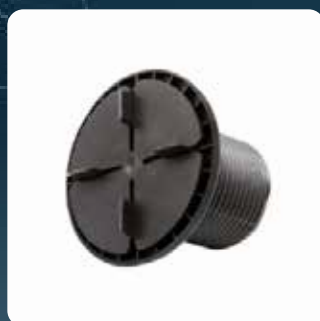

### Self-leveling disc

**The self-leveling disc is used to compensate up to 5% slope over 1 meter.** It allows the installation of a structure on unlevelled ground. This accessory is suitable with all pedestals in the decking and the paving range from 40/60 mm.

### Vibration buffer

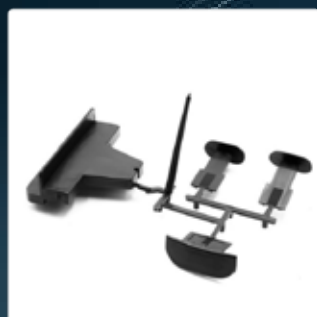

**The vibration buffer is used when installing a tiled terrace.** Its primary function is to attenuate the vibrations triggered by movement on the surface of the terrace as well as to reduce the possible resonance. Thanks to this accessory, noise pollution is reduced by 50%.

### Slab plate

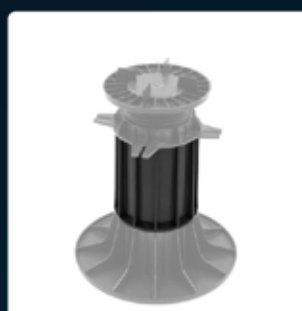

The slab plate for pedestal allows the laying of tiling «against the facade» and also for the edges of the terrace. This accessory allows an optimal stabilization of the ends of the terrace and also aesthetic finishings. It is suitable with paving pedestals from 40/60 mm.

### Lateral riser support

The lateral rise support is fixed to the base of the pedestal by interlocking, thus allowing the vertical installation of a slab or a wooden strip to clad the lateral riser support of the structure. When used with a slab plate, it allows a lateral closure for a perfect finish.

### Extension 60 mm / Extension 110 mm

The extensions allow to increase the final height of the pedestal. It's possible to stack up to 4 extensions on a single pedestal, thus obtaining an additional of 440 mm. Compatible with the pedestals of the decking and paving range from 60/90 mm for the 60mm extension and from 90/150mm for the 110 mm extension. It allows to reach a final height of 70 cm.

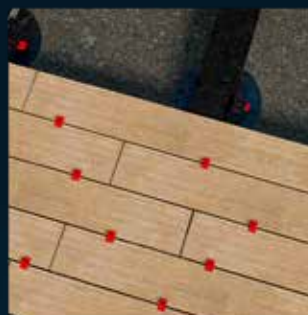

### Head of pedestal for decking

The head of pedestal for decking is an accessory that transforms a slab pedestal into a decking pedestal. It can be adapted to all adjustable pedestals by simply exchanging the head of pedestal for decking with the existing head.

### Blade spacers

---

This accessory for wooden decks helps to prevent the natural movements of the wood that can lead to damage the installation, ensure a good air circulation and water evacuation. The deck blade spacers is made up of 4 sides of different thickness : 4, 5, 6 or 7 mm.

### Self adhesive bituminous tape

---

Designed to protect joists against moisture and rainwater and thus increase the life of the terrace. This band is 100% waterproof and adheres to most building materials : wood, plastic, glass, concrete, metal, etc.

### Post Pedestal

The adjustable pedestal adapts to posts of 90x90 mm. This accessory allows easy construction of wooden structures on any type of grounds.

Its advantage is to enable the creation of structures on an uncemented ground while maintaining a robustness.

This accessory is particularly appreciated for the construction of **wooden extensions, bungalows and pergolas**.

### YEED ClipSystem

The YEED ClipSystem, made of **stainless steel**, is a 2 in 1 accessory :

Firstly, it closes the terrace aesthetically by simply clipping onto the ends of the terrace. Secondly, this durable lateral closure accessory also replaces the slab plate whose function is to **stabilize** the slabs at the ends of the surface and thus **avoid any sensation of tilting**.

It is compatible with the pedestals of paving range from 40/60 mm. It is made up of 2 parts: the top clip which is clipped onto the 2 lateral lugs (which are sectible lugs) on the head of the pedestal, and the bottom clip which is clipped onto the base of the pedestal.

### A team attentive to your needs

---

**At YEED, we don't believe that exchanges are all about a basic customer/supplier relationship.** Communication and the perpetual desire for improvement and collaborative development are the engines of our way of working.

We follow your projects and help you to realize new ideas. Research and development are important points on which we are working in order to always be able to offer products that are perfectly suited to the needs of our customers.

Availability and listening are the keys to a successful relationship. YEED is committed to the service it provides to its partners and relies on longevity partnerships.

## A global presence

YEED Products are provided Worldwide.

Our distribution network ensures fast deliveries, volumes availability, close follow-up and always with the best service.
