

Post pedestal 60/90 mm

The post pedestal is designed for the realization of raised wooden structures such as pergolas, bungalows or terraces on stilts. Its head allows to receive a wooden post of dimension 90x90 mm.

For the installation of wooden cladding: use joists of the same essence as the blades. And never use composite joist for a wooden terrace.

Note: Always calculate the height you want to catch up by deducting the thickness of the coating in order to obtain the necessary pedestal size.

Made In France

Application & Use

Creation of raised wooden structures: pergolas, bungalows, terraces on stilts for pedestrian use

The installation is done only on stabilized ground by following the recommendations of use of the joists.

Technical Characteristics

Composition : polypropylene (recycled and recyclable)

Color : black

Origine : France

Garantee : 10 years

Conformity : norm DTU 43.1

Use : pedestrian only

Base diameter : 200 mm

Head diameter : 120 mm

Lug height : 30 mm

Resistance to temperatures : from -40°C to +60°C

Resistances to atmospheric agents : UV and freeze

Load resistance : up to 1 ton

Product Advantage

- + Simplified ground preparation
- + Base designed to ensure proper drainage of stormwater
- + Adjustment to the millimeter thanks to the nut without additional tools
- + Compatible with natural and composite blades
- + Aesthetically pleasing thanks to invisible fasteners and regular blade spacing
- + **Compatible accessories : extensions 60 mm**
