

Acoustic isolation pad

Reduces impact noise and floor vibrations.

Application & use

Compatible with all YEED pedestals, the isolation PAD reduces impact noise and floor vibrations.

It can be slipped under the base of the pedestals or directly under the joist to avoid direct contact with the floor and to protect it from moisture.

Technical characteristics

Composition : High quality rubber granules and PU glue

Colour: black or speckled black

Thickness: 3 or 5 mm

Resistance to temperatures: from -30°C to 80°C

Resistance to atmospheric agents: UV and frost

Advantages

- + Noise and vibration reduction
- + Improves grip on the ground
- + Can be placed under the pedestal without fixation
- + Protects the roof membrane
- + Compatible with all YEED pedestals
- + Protects the joist from moisture
