UNIKA adjustable pedestal 30/40mm

Discover the most efficient solution for any slab terrace installation. The UNIKA pedestal is height-adjustable from 30 to 40 mm. It can be raised to a height of up to 1 meter using the extension accessory. The height can be easily adjusted to the nearest millimeter using the adjustment ring: from the top by using the YEED Tightening key, or manually from the side.

The UNIKA pedestal is an all-in-one revolution: the noise buffer accessory is integrated directly onto the pedestal head, and the red clamping ring makes the head self-levelling or fixed.

Note: always calculate the height to catch up by deducting the thickness of the covering to obtain the required pedestal size.

Application & use

Creation of terraces in porcelain stoneware, stone, concrete or gratings for pedestrian use.

The installation on pedestals requires the use of a covering with a minimum thickness of 2cm. It is possible to use tiles (porcelain stoneware), concrete slabs, reconstituted or rectified natural stone (5cm thick)

Technical characteristics

Composition: polypropylene (recycled and recyclable)

Color: black and red*

Origin: France

Garantee: 10 years

Conformity: norm DTU 43.1

Use: pedestrian only

Weight: 284g

Base dimension: 200 mm x 200 mm

Head diameter: 142 mm

Lugs : Height 8 mm / Thickness 4 mm

Resistance to temperatures: from -40°C to +60°C

Resistance to atmospheric agents: UV and frost

Load resistance: up to 1 ton

Product benefits

- + Easier and faster to use
- + Square and pre-cut base plate, which adapts perfectly to corners and angles
- + Height adjustment on the side manually and on top with the YEED tightening key
- + Integrated noise buffer
- + Self-leveling or fixed pedestal head
- + 4 removable lugs for easy installation
- + **Compatible accessories**
 - **YEED tightening key**

*Please note that shades of colour different from those shown on this product sheet may occur. The black may be slightly greyed and the red colour of the adjustment ring may also differ in shade. These possible disparities are linked to the fact that the material used in the manufacture of our products comes from the household products recycling network and it is therefore impossible to have strictly the same pigment behaviour with regard to the recycled composition. This in no way affects the quality of our products, which once injected all meet the same criteria and are strictly controlled. Although these cases are rare, you should consider that buying the YEED brand means becoming part of a network of products that respect the environment and are part of an ecological approach.
