

Angle Top Clip

Enables aesthetic closure of terrace corner ends while stabilizing the slabs.

Made in France

Application & use

The UNIKA corner top clip is a stainless-steel accessory for aesthetically closing terrace corners, simply clipping onto the post head.

This durable side closing accessory also replaces the slab plate, whose function is to stabilize the slabs at the ends of the overhang and thus avoid any sense of tipping. Break off the lugs and clip the corner top clip onto the pedestal head. Then slide your slab or terrace board sideways.

Technical characteristics

Composition: stainless steel

Color: grey

Weight: 3,9 g

Dimensions : 183 x 183 mm

Thickness: 1 mm

Resistance to atmospheric agents: UV and frost
