

Straight Top Clip

For aesthetic closure of terrace ends while stabilizing slabs.

Made in France

Application & use

The straight UNIKA topclip is a stainless steel accessory that allows you to close your deck aesthetically by simply clipping it onto the ends of the deck.

This durable side-closure accessory also replaces the slab plate, whose function is to stabilize the slabs at the ends of the overhang and thus avoid any feeling of tipping. Clip the straight topclip onto the pedestal head and slide your slab or deck board sideways.

Technical characteristics

Composition: stainless steel

Color: grey

Weight: 3,9 g

Dimensions : 183,4 x 29,7 mm

Thickness: 1 mm

Resistance to atmospheric agents: UV and frost
