

## Acoustic isolation pad - 3 mm

Reduces impact noise and floor vibrations.

### Application & use

Compatible with all YEED pedestals, the isolation PAD reduces impact noise and floor vibrations.

It can be slipped under the base of the pedestals or directly under the joist to avoid direct contact with the floor and to protect it from moisture.

### Technical characteristics

**Composition :** High quality rubber granules and PU glue

**Colour:** black or speckled black

**Thickness:** 3 mm

**Resistance to temperatures:** from -30°C to 80°C

**Resistance to atmospheric agents:** UV and frost

**Packaging :** 20 units

### Advantages

- + Noise and vibration reduction
- + Improves grip on the ground
- + Can be placed under the pedestal without fixation
- + Protects the roof membrane
- + Compatible with all YEED pedestals
- + Protects the joist from moisture
