

Vibration buffer

Reduces the resonance and vibrations of the structure.

Made In France

Application & Use

Designed for the creation of slab terraces: ceramic, stone or concrete for pedestrian use. Reduces vibrations and resonance of the terrace when moving on the surface.

Compatible with all slab pedestals except fix 8 mm.

Technical Characteristics

Composition : rubber

Color : black

Origine : France

Garantee : 1 year

Conformity : norm DTU 43.1

Use : pedestrian only

Thickness : 3 mm

Resistance to temperatures : from -40°C to +60°C

Resistance to atmospheric agents : UV and freeze

Product Advantages

- + Reduction of noise and resonance on the terrace surface
- + Compensates different slab thicknesses
- + Improves the adhesion of the slab to the head of the pedestal
- + It clip on the pedestal base without any fixing
